Success Story

This family self-referred for services needing help with treating the home for bed bugs and financial resources as they were behind on all household bills. The family consists of Grandmother and three children. The family was provided a resource guide for their community which included financial and community supports for the family. Grandmother was able to connect with community resources to assist her in catching up her bills. The family was able to treat their home for bed bugs themselves and was successful in the treatment. A pest control agency verified that the home was clear of bed bugs. Through the use of concrete funding, the family was able to purchase a washer and dryer. This enabled them to treat all of the clothing and bedding in the home. The family now has a safe and bug free home.
